

Serial No. 10/690,172
Docket STD 1204 PA/41213.558

AMENDMENTS TO THE CLAIMS

IN THE CLAIMS

Please revise the claims by canceling claims 3, 16 and 28;

Claims 1 and 2. (Canceled).

3. (Canceled)

Claims 4 - 15 (Canceled).

16. (Canceled)

Claims 17 - 23 (Canceled).

24. (Previously presented). A method of providing security information, comprising:
- providing a water-based ink comprising:
 - about 5 to about 50 percent by weight of at least one optically variable pigment;
 - at least one binder; and
 - water;
 - printing at least a portion of a substrate with said water-based ink utilizing flexographic printing, wherein:
 - said portion of said substrate printed with said water-based ink displays a viewing angle dependent color shift between at least a first color and a second color;
 - said portion of said substrate printed with said water-based ink comprises security information; and said security information is not reproducible via

photocopying; and
printing said substrate utilizing laser printing subsequent to printing at least a portion of said substrate with said water-based ink wherein said security information remains intact during said laser printing.

Claims 25 - 27 (Canceled).

28. (Canceled)

Claim 29 (Canceled).

30. (Previously presented) The method as claimed in claim 24 wherein said at least one optically variable pigment comprises about 10 to about 20 percent by weight of said water-based ink.

31. (Previously presented) The method as claimed in claim 24 wherein said substrate comprises a paper substrate.

32. (Previously presented) The method as claimed in claim 24 wherein said substrate comprises a plastic substrate.

33. (Previously presented) The method as claimed in claim 24 wherein said substrate comprises a security document.

34. (Previously presented) The method as claimed in claim 24 wherein said water-based ink is printed on said substrate such that said substrate is spot-coated.

Serial No. 10/690,172
Docket STD 1204 PA/41213.558

35. (Previously presented) The method as claimed in claim 24 wherein said water-based ink is printed on said substrate such that said substrate is flood coated.

36. (Previously presented) The method as claimed in claim 24 wherein said water-based ink is printed on said substrate such that at least one indicia is formed thereon.

37. (Previously presented) The method as claimed in claim 24 wherein said substrate comprises a security document selected from a check, a money order, a certificate, an auto title, a bearer bond, a stamp, a postal order, and a lottery tickets.

38. (Previously presented) The method as claimed in claim 24 wherein said substrate comprises a check.
